- Data & Tools: SQL, Power BI (DAX), Excel (Pivot Tables, Power Query), Python (Pandas, NumPy)
- Analytics & BI: Data Analysis, Dashboard Development, Data Modelling, ETL
- Problem Solving & Operations: Issue Identification, Data Validation, Process Support
- Communication & Collaboration: Stakeholder Communication, Client Interaction, Reporting & Documentation
- AI & Automation: ChatGPT, Claude, GitHub Copilot, Power BI Copilot; applied in SQL querying, data cleaning, documentation, and process automation
- Other: Tableau, Agile/Scrum

Experience

Trip.com 2024.03 - 2024.08
Data Analyst Intern (AI Marketing Analytics)

- Business Performance Analysis: Analysed 20,000+ marketing articles using SQL and Python to identify key drivers of CTR and user engagement.
- Insight Generation: Identified price-focused content achieving CTR up to 58%, increasing traffic share by +3.2%.
- Lifecycle & ROI Analysis: Built Power BI dashboards to analyse content decay, identifying that 80% of exposure declined within 4–5 days, supporting redistribution strategies and achieving 2.5× ROI.
- Stakeholder Collaboration: Worked with product and operations teams to understand requirements and ensure analytical outputs aligned with business needs.
- Problem Solving & Support: Investigated and resolved data-related issues, ensuring accuracy and supporting business reporting needs in a fast-paced environment.

Shanghai Junshi Biotechnology Co., Ltd 2020.12 - 2021.03
Supply Chain Management Intern

- Supply Chain Coordination: Coordinated with pharmaceutical suppliers to resolve data discrepancies and ensure accurate product and distribution information.
- Data Accuracy & Operations Support: Validated and maintained supply chain data to ensure reliable product availability.
- Problem Solving: Identified and resolved discrepancies in supplier and product data, improving operational efficiency.
- Cross-functional Collaboration: Worked with procurement, operations, and logistics teams to support supply chain processes.

Projects

John Deere Data Governance 2025.03 - 2025.06 Sydney

- Process Understanding: Designed data architecture to integrate multiple data sources, supporting business reporting and decision-making.
- Data Modelling: Built logical data models to improve data organisation and accessibility.
- Governance & Control: Applied data validation and access controls to ensure data accuracy and compliance.

Hospitality Experience (Part-time)

Front of house 2025.08 - 2026.04
Grandfather's Sydney

- Customer Service: Delivered face-to-face service in a fast-paced hospitality environment, handling customer requests and resolving issues efficiently.
- Communication: Developed strong interpersonal and problem-solving skills through daily interaction with diverse customers.
- Multi-tasking: Managed multiple tasks simultaneously under pressure while maintaining high standards.
